

PAT METHENY

the **orchestrion** tour

Using a completely new kind of modern technology to expand his musical vision, 17-time Grammy-winning guitarist **PAT METHENY** will for the first time perform all original compositions in concert entirely alone—an ensemble presentation with no other musicians onstage.

To this end, he has created a new **ORCHESTRION**, an ensemble of mechanical instruments controlled entirely from Metheny's guitar and pen performing a unique program of original music. Metheny has always been at the forefront of introducing new creative tools to aid his expansive approach to music. Now, Metheny will perform using new types of instruments that integrate conventional acoustic sound and robotic technology. This will be a performance unlike any other.
